## **DAILY SYSTEM ENERGY REQUIREMENTS**

Amps = Watts divided by Volts. Volts = Watts divided by Amps. Watts = Volts times Amps.

## AC Appliances, Equipment, Lights, Electronic Gadgets (TV Etc)

Load Description	Volts	Amps	Qty	Power Rating (Watts)	Operating Time (hrs/day)	Energy Consumption (wh/day)
Example: Microwave Oven	120	10	1	1,200	*20 Min	*400 W
DC Appliances, Cell Phone Chargers etc		l				

1,200 watts per hour / 60 min X 20 min use = 400 watts per day.	Total AC Power	Watts
	Total DC Power	Watts
Total AC En	ergy Consumption	Wh
Total DC Energy Consump		Wh
